What is the pricing model of Wise2Sync?

Wise2Sync is a SaaS platform and is hosted on our servers. We improve it constantly and support our customers free of charge with any of Pricing plans. We charge our customers on a monthly basis and the payment has to be done upfront.

Fees for using our services mainly depend on:

- amount of products (SKU) we handle from your products feeds or suppliers
- number of suppliers / different data sources and export profiles (integrations)
- frequency of data sync and update

Follow this link to check our pricing plans.
